- **Problem Statement ID-** SIH25059
- **Problem Statement Title-** Enhancing Student Awareness on difference between Aadhaar linked and Direct Beneficiary Transfer(DBT) enabled Aadhaar seeded bank account.
- **Theme-** Miscellaneous
- **PS Category-** Software
- **Team Name-** Debug Thugs

• Proposed Solution (Comprehensive Learning Platform)

Comprehensive DBT Awareness Platform: A robust web and mobile application ecosystem design to explain difference between DBT enabling and Aadhaar linking

Interactive Modules : Step-by-step guides for account setup and DBT registration

Visual Learning : Infographics and animations explaining Basic DBT concepts

AI Chatbot Support : 24/7 assistance for student queries and troubleshooting

Student Volunteering: Track outreach activities
Upload awareness session reports

NOTE : Our platform will be available in multiple regional languages to ensure accessibility across India's diverse student population.

DBT MITRA: Student Awareness Journey

TECHNICAL APPROACH

• Technology Stack

Frontend : Reach Js, React Native, Redux, Next Js, Tailwind CSS, Framer Motion.

Backend : Node Js, Express Js, REST API.

Database : MongoDB, PostgreSQL

Authentication and User Management : Firebase Auth, Auth0.

API Services : UIDAI (demo), PFMS (links) NPCI Mapper (status).

Deployment : AWS, Docker, GitHub, GitBook, GCP

Optional : Integrate Digi Locker API for real Aadhaar document simulation (if permitted).

FEASIBILITY AND VIABILITY

Feasibility:

- Leverages existing digital infrastructure (Aadhaar, bank portals, mobile apps).
- Can be integrated with student portals and school databases for smooth onboarding.
- Compatible with low-end smartphones and basic internet connectivity.

Viability:

- High student engagement due to interactive modules and visual learning.
- Scalable across multiple states and languages.
- Reduces dependency on manual bank support.

Use Cases:

- Step-by-step DBT account registration guidance.
- 24/7 AI chatbot support for queries.
- Visual learning modules for complex banking concepts.
- Real-time DBT status updates and troubleshooting

Challenges:

- Misconception: Aadhaar linking $\neq$ DBT readiness.
- Low banking literacy among first-time users.
- Privacy concerns regarding personal data.

Business Potential:

- Can reach millions of students across India.
- Partnerships with banks, government portals, and educational institutions.
- Potential to reduce manual support costs and improve financial inclusion.

Strategies to Overcome Challenges:

- Multilingual support for regional accessibility.
- Visual & interactive modules to simplify concepts.
- AI chatbot to instill trust and provide instant help.
- Awareness campaigns through schools, colleges, and community programs.

★ Supporting Facts ★

- ❖ Over 30% of students lack clarity on DBT processes (Gov. survey).
- ❖ Mobile penetration > 80% among students.
- ❖ Digital payments & DBT transactions growing 20–25% annually.
- ❖ 70% of first-time account holders need guidance on DBT setup.
- ❖ India has 22+ official languages, necessitating multilingual support.
- ❖ School/college portals already collect Aadhaar & bank info.
- ❖ AI chatbots reduce query response time by up to 90%.
- ❖ Financial literacy programs have shown increased DBT uptake.
- ❖ Rural areas face internet bandwidth constraints, addressed by lightweight modules.
- ❖ Government aims to digitally empower 100% of eligible students

IMPACT AND BENEFITS

Social Impact

- Ensures fair access: every eligible student gets benefits without middlemen.
- Reduces exclusion and inequality, especially for rural or first-generation learners.
- Strengthens sense of citizenship participation in government programs.
- Encourages peer-to-peer sharing of correct financial knowledge.

Educational Impact

- Supports continuity in education by ensuring scholarships, stipends, and fee reimbursements arrive directly.
- Reduces student stress around financial uncertainty.
- Helps institutions plan better when student benefits are paid promptly.
- Promotes awareness of financial rights and responsibilities.

Economic Impact

- Guarantees direct, timely credit of subsidies/scholarships.
- Prevents leakages and corruption, ensuring every rupee reaches the rightful student.
- Encourages students to open and maintain formal bank accounts, improving financial literacy.
- Reduces dependency on cash or middle agents.

Technological Impact

- Encourages students to use digital banking apps, UPI, and SMS alerts, improving digital confidence.
- Promotes paperless, tech-driven governance.
- Teaches students about the role of digital identity (Aadhaar) in modern financial systems.
- Builds familiarity with cyber safety and data privacy concepts.
- Creates a culture of instant verification and transparency in transactions.

Comparison with Existing Systems
